

Rolf Aaberge

*Reading list for the talk “Unambiguous Comparison of Intersecting Distribution Functions” on the **Seventh Doctorate Winter School on Inequality and Social Welfare Theory***

Aaberge, R. (2000): “Characterizations of Lorenz curves and income distributions,” *Social Choice and Welfare*, 17, 639–653.

Aaberge, R. (2001): “Axiomatic Characterization of the Gini Coefficient and Lorenz Curve Orderings,” *Journal of Economic Theory*, 101(1), 115–132.

**Aaberge, R. (2009): “Ranking intersecting Lorenz curves,” *Social Choice and Welfare*, 33(2), 235–25.

**Atkinson, A. B. (1970): “On the measurement of inequality,” *Journal of Economic Theory*, 2(3), 244 – 263.

*Chew, S.H. (1983): A generalization of the quasilinear mean with applications to the measurement of inequality and decision theory resolving the Allais paradox, *Econometrica*, **51** (1983), 1065-1092.

Durbin, J. (1973): Distribution theory for tests based on the sample distribution function, Regional conference series in applied mathematics. Society for Industrial and Applied Mathematics.

Ebert, U. (1987): “Size and distribution of incomes as determinants of social welfare,” *Journal of Economic Theory*, 41(1), 23–33.

Fishburn, P. C., and R. D. Willig (1984): “Transfer principles in income redistribution,” *Journal of Public Economics*, 25(3), 323 – 328.

Hájek, J., and Z. Šidák (1967): Theory of rank tests, Probability and mathematical statistics. Academic Press.

*Muliere, P. and M. Scarsini (1989): “A note on stochastic dominance and inequality measures,” *Journal of Economic Theory*, 49(2), 314–323.

Yaari, M. E. (1987): “The Dual Theory of Choice under Risk,” *Econometrica*, 55(1), 95–115.

*Yaari, M. E. (1988): “A controversial proposal concerning inequality measurement,” *Journal of Economic Theory*, 44(2), 381 – 397.

Zoli, C. (1999): “Intersecting generalized Lorenz curves and the Gini index,” *Social Choice and Welfare*, 16(2), 183–196.
